EDUCATION

Columbia University – School of Engineering and Applied Science **Expected Graduation: May 2028**
B.S. Computer Science | GPA: 4.08 | Minor in Economics
Relevant Coursework: Advanced Programming, Data Structures, Computer Science Theory *(In Progress)*, Databases *(In Progress)*

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C++, C, HTML/CSS
Frameworks & Tools: React, React Native, Expo, Node.js, Express, Firebase (Firestore), Git, REST APIs, OAuth 2.0, TensorFlow

EXPERIENCE

Immersive Black Experience Travel App (IBETA) **June 2026 - Present**
Frontend & Product Systems Engineering Intern

- Established React Native app foundation using Expo Router, defining project structure and navigation architecture
- Built and integrated 10+ reusable React Native components supporting navigation across 20+ app screens
- Established reusable frontend service modules and API interfaces for core app features, preparing the app for backend integration

Talk With Someone Like You **October 2025 - Present**
Backend Engineer Intern

- Built and tested reusable Firebase Firestore helper functions using JavaScript/Node.js to support peer-support matching workflows
- Implemented Firebase Authentication and Firestore user provisioning logic to prevent duplicate user records
- Designed and extended Firestore data models across users, pairs, and messages for a peer-support platform

Hashfire **December 2024 - January 2025, June 2025 - July 2025**
Full Stack Developer Intern

- Integrated LinkedIn OAuth authentication with Node.js, Express, and React, reducing onboarding time by 50% through automated profile population
- Debugged and resolved authentication and session management issues across React and Node.js, restoring reliable login and session persistence

PROJECTS

Machine Learning Project **August 2023**

- Developed a deep learning classifier in Python and TensorFlow to detect distracted driving from 8,000 images using transfer learning
- Improved model accuracy to 76% through hyperparameter tuning and model optimization

STEM Fellowship High School Big Data Challenge | Research Author **2022, 2023, 2024**

- Cleaned, filtered, and analyzed real-world datasets in Python using Pandas and Matplotlib to investigate trends aligned with UN Sustainable Development Goals
- Published research findings and presented insights to industry professionals over three consecutive years
- Selected as a finalist three consecutive years from 100+ submissions; received Let's Talk Science Analytics Award (2023) and Entrepreneurial Thinking Award (2022)

HONOURS & INVOLVEMENT

- **Head Teaching Assistant, Intro to Computing:** Lead weekly 1-hour Python programming recitations and hold office hours for 200+ students per semester, teaching programming fundamentals and algorithmic thinking
- **Diversity & Inclusion Lead, Women in Computer Science:** Organize monthly professional development and community events serving 30+ CS students/event
- **Logistics Team, DivHacks:** Coordinated operations for 350+ participants, including meal delivery and distribution
- **Vice President of Finance, Hall Council:** Managed budgets and monthly event funding for 600+ residents
- **Dean's List (2024–26) | Governor General's Academic Medal (2024):** Highest academic average among graduating class
